# laminating & binding

Special 50+ roll pricing on laminating film if purchased with any laminator - see page 98

**NEW!**

### A. Banner Easy-Lam 27" School Budget Roll Laminator

We have rolled school laminator prices back to the 1980s with the new EASY-LAM SCHOOL BUDGET laminator.

Not only is the price stunning but the EASY-LAM SCHOOL BUDGET is a heated roller machine that laminates better than many more expensive heat shoe machines. And because it laminates school laminating film at a lower operating temperature, you'll have fewer complaints about odor from film dwelling at high temperatures in enclosed school spaces. Running at a lower temperature will lower energy costs too! Adjustable digital heat controller • Built-in LED temperature display • Adjustable supply roll tension • Attached safety shield • Heated silicone laminating rollers • Reverse feature • Adjustable feed table guide

BA-EZ27SB

List \$1,499.99

**\$899.95**

### B. Banner Easy-Lam 27" Roll Laminator

Laminates either .0015" or .003 gauge film • Easy loading, plenty of clearance for film loading (no more burnt knuckles when "hot loading") • Pressure, speed and roll tension are preset allowing for little instruction on usage • Adjustable heat knob for different thickness materials • Reverse switch clears any wrap-arounds • Plastic width: 27" • Speed: 4'/minute • UL and CSA approved

BA-EZ27

List \$1,795.00

**\$1,274.95**

### C. Banner Easy-Lam Roll Laminator with Variable Speed Control

Same as above plus: variable speed control

BA-EZ27VS

List \$1,895.00

**\$1,374.95**

### D. Banner Easy-Lam II 27" Roll Laminator

Designed expressly with the teacher in mind, Easy-Lam II™ is engineered to be school safe and user friendly

Attached safety shield • Drop-down bottom idler for easy loading • Silicone laminating rollers • Reverse switch • Heavy-duty DC motor • Built-in thermometer • Adjustable heat control • Adjustable supply roll tension • Built to UL/CSA specifications

BA-EZ27II

List \$1,895.00

**\$1,649.50**

**Cold Lamination – Fast, Easy Operation**

Because cold laminators do not use heat, no electricity is needed to operate the machine. That means there is no warm-up time and your material will move quickly through the laminator. There is no need to adjust the roller tension or thermostat. All you have to do is turn the handle! Also, little maintenance is required compared to hot roll laminators.

**Superior results**

With cold lamination, wrinkles or bubbles are much less likely to form. Cold laminators won't harm heat sensitive documents or photographs.

**A better, safer laminating experience**

The plastic laminate won't melt and stick to the rolls as it can with a hot laminator, meaning you won't experience a burnt plastic odor. And no heat means no chance of burns and no potential fire hazard - all reasons why cold laminators are a practical choice for schools, offices, and sensitive work environments. They are ideal with untrained or unsupervised staff who have a need to use the machine.
